- Data Analysis & Management Information Systems
- Client Relationship Management

Education

Bachelor's Degree in electronic and communication engineering

Damascus University

Professional Experience

Projects in frontend :

1. Personal Portfolio website:

This is a modern portfolio website built with React and styled to reflect my work and skills as a frontend developer. It took me around two weeks to complete , and it includes animations , and my works and contact options I worked hard on the design to reflect my personality and style

Link to my portfolio : <https://my-portfilo-wwf6.vercel.app/>

2. Elite-restaurant website:

This web is a react with typescript project , it took me about whole month to complete this web because I faced a lot of problems like finding a good api for foods and the data management was a big problem for me so I had to learn redux to manage the data

Link to the project : <https://abood123-dev.github.io/rest-elite/>

3.Real Estate website:

This web is react and typescript project , it took me about two weeks to finish it , in this project the biggest problem I had faced is not finding a good api about villas and apartments so I made the api by myself and I published it on the internet so I can fetch the data and use the api , Hope you like it

Link to the project: <https://abood123-dev.github.io/Realestate-project>

4.Roger for selling Yachts in Dubai website :

This web was from my beginning , its just a single page application which I build from html and css , Hope you enjoy it

Link to the project: <https://abood123-dev.github.io/project22.github.io/>

5.Car store website:

This is a full-stack project built with Next js. I created all the car data manually ,published it , and fetched it dynamically I handled everything from layout to functionality . It helped me practice routing , state management and working with apis

Link to the project :<https://cars-liard-alpha.vercel.app/>

Training

Frontend web development

Programming and coding has always been my passion , so two years ago I started Learning frontend web development , I started with html and css then I learned the basics of javascript and I finished a whole course on react js . in the end I made four multi-pages react projects .

UiPath Academy – RPA Developer Foundation Training

Successfully completed the UiPath RPA Developer Foundation Training, gaining hands-on experience in designing, developing, and deploying automation workflows using UiPath Studio. The training covered key concepts such as selectors, data scraping, UI automation, exception handling, and Orchestrator, along with best practices for debugging, workflow optimization, and managing the automation lifecycle.
